

Tahir Malik (Data Engineer)

New Delhi, IN | tahir.malik296@gmail.com | +91 9971587221 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Amity University

B. Tech in Information Technology (C.G.P.A – 8.45/10)

Relevant Coursework: Python, SQL, Big Data & Fundamentals

Jul 2017 – Apr 2021

Gurugram, India

Amity University

Bachelors in economics (C.G.P.A - 8/10)

Relevant coursework: Indian Economy, Micro & Macro Economics (Minor Degree)

Jul 2018 – Apr 2021

Gurugram, India

PROFESSIONAL EXPERIENCE

Data Engineer Intern, Mactores, Mumbai

28/04/2025 - 31/07/2025

- Learned data engineering workflows on the Databricks Lakehouse Platform, focusing on ETL pipeline monitoring, debugging, and data quality validation using Apache Spark and Delta Lake.
- Earned the Databricks Certified Data Engineer Associate & AWS Cloud Practitioner credential during the internship.

Associate Software Engineer, DXC Technology, Noida

13/05/2021 - 26/05/2022

- Supported and maintained ETL pipelines for Carrefour using Azure Data Factory, ensuring efficient data integration and transformation processes.
 - Monitored and troubleshooted pipeline issues to minimize downtime, enhance performance, and ensure accurate data delivery for business-critical operations.
 - Collaborated with cross-functional teams to optimize workflows, implement enhancements, and ensure adherence to organizational data standards.
-

PROJECTS

Fintech Data Migration Pipeline

- Developed scalable pipelines for migrating and transforming data of a fintech company from their traditional SQL database to Azure Data Lake, ensuring data consistency and minimal downtime.
- Implemented a medallion architecture within ADLS Gen2 using PySpark & Delta Lake to effectively manage and process data, improving data accessibility and reliability.
- Implemented automated email notifications to track pipeline success or failure, enhancing operational visibility and response times.

E-Commerce Data Streaming Analytics

- Developed a robust data pipeline leveraging Confluent Kafka to collect e-commerce clickstream and user activity data, enabling real-time analytics capabilities.
 - Combined Azure Data Lake Storage Gen2 (ADLS Gen2) with Databricks to efficiently store, cleanse, and convert raw data into formats suitable for analysis, facilitating actionable insights.
 - Engineered a production-grade workflow featuring Kafka producers for managing user profiles, delivery statuses, orders, and clickstreams, showcasing proficiency in practical streaming applications.
-

TECHNICAL SKILLS

Languages: Python, SQL

Big data & Fundamentals: Hadoop, Hive, Kafka, Apache Spark, Databricks, Airflow, MongoDB, Docker, Git

Cloud Services: Azure Data Factory, Azure Synapse Analytics, Azure Function App, Azure Data Lake Storage, Azure Cosmos DB, Azure SQL Database, GCP Dataproc, GCP Pub/Sub, GCP Cloud Storage, Snowflake, Dimension & Fact Table, BigQuery

Soft Skills: Communication, Analytical Thinking, Problem Solving, Team Player, Data-Driven Decision Making

Software Tools: MS PowerPoint, MS Excel, Premiere Pro, Photoshop, Illustrator
